SCHOOLS GO GREEN

SCHOOLS GO GREEN

SCHOOLS GO GREEN – Developing a Whole-School Approach to Promote Social Change and Sustainable Development as a Response to Environmental Challenges

Project number: 2020-1-DE03-KA201-077258

Implementation period: 01.10.2020 – 31.03.2023

Project description

Schools have an important role to play as innovators of social change and sustainable development for a circular economy. The project aims to provide an upskilling pathway programme for teachers in order to strengthen their profiles in deal with environmental and green issues, so that they can support young pupils (pre-primary and primary) aged 5-12 yrs old to explore environmental issues, engage in problem solving, and take action to improve the environment in their school and in their community. As a result, pupils will develop skills for making informed and responsible decisions in their daily life.

The project aims to promote from an early age an enviornrmentally friendly mindset that could contribute towards the protection of the environment and prevent climate change. In order to secure a future for the younger generation it will be necessary to promote green thinking which takes into account ethical and social considerations. This means that traditional school curricula, need to be complemented by teaching pupils global environmental concepts that need to be tackled locally and individually. In this way, pupils will develop a caring attitude towards the environment demonstrated by actions (save resources, reduce waste, compensate carbon footprint emissions, choose sustainable food and mobility choices, etc.), of services, the Green Glossary Book and the whole school policy documents for 6 different EU countries.

The expected impact on the pupils, teachers and the schools is substantial, as Green or Environmental Skills are rarely taught at schools, as part of the curriculum. Pupils will have an opportunity from a very young age to be equipped with knowledge and comptences to address environmental issues andchallenges that affect their communities. Teachers will upgrade their skills, as well as enhance their teaching methodologies and tools to be able to contribute to the protection of the environment.

The project will produce 4 main Intellectual Outputs: GO GREEN syllabus-curriculum, the educational resources

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Piloting of the modules in School Nowa Wieś

Activity description	Prior to the pilot phase, teachers from Nowa Wieś were trained on how to navigate the Schools Go Greean project's online platform. During the pilot, the modules as well as the barometer and data bank were presented to the pupils of the primary school in Nowa Wieś.
Date (dd-mm-yyyy)	04-01-2023
Partner	Danmar
Type	Other
Dissemination level	EU
Target groups	**Direct Target group:**Primary school teachers and children (6-12 years old) **Indirect Target groups:**Schools, NGOs, local authorities, parents' associations, policy makers etc.
Activity number of participants	35
Impact of the activity	Teachers became familiar with the online platform and increased their knowledge of the project themes. Pupils were introduced to a new tool to develop their knowledge.
Feedback received	Teachers were positively surprised by the interactivity of the platform. They mentioned that when the final version is developed they will be happy to use it in their future activities.

Multiplier Event

Activity description	On 23.03.2023, Danmar Computers organized an event “ME4 - SCHOOLS GO GREEN: presenting the green whole-school approach to promote social change in environmental education for a sustainable future” within the framework of the Schools Go Green project (Project no: 2020-1-DE03-KA201-077258). The event was held at the Damar Computers training room (ul.Hofmanowej 19, 35-016 Rzeszów. The event was attended by 33 participants. It was a half-day conference-style event and lasted 5h according to the previously prepared agenda.
Date (dd-mm-yyyy)	23-03-2023
Partner	Danmar
Type	Event
Dissemination level	EU
Target groups	The participants of the multiplier event were pupils, parents, school leaders, stakeholders, teachers, scientists, academics, researchers, social workers, adult educators, trainers and also Danmar Computers staff.
Activity number of participants	33
Impact of the activity	The national event had the following objectives: -to present all products and results of the project in order to raise awareness, create interest for exploiting the project’s results by re-implementing the programme again and utilising all resources created by the consortium. - to present the impact of the project activities on the participants, their organisations and the stakeholders involved for promoting environmental education as grassroots initiative that has personal, social, community and economical benefits. - to foster communication, cooperation and links between all agents and the uptake of the use of the products (capacity building training, learning modules, network, platform, Open Badges etc.) for other pupils, teachers, parents, leaders, youth Centres and Assosiations. - to promote the priorities of the Erasmus+ programme and the recommendations of the European Commission in relation to the Pupils Strategy, European Green Deal. - to influence the EU and National community to support initiatives and efforts linked to the development of a community of “green” conscientious young people working on sustainable solutions for addressing environmental challenges.
